

Booking Funnel Audit

Prepared for [CLIENT / BUSINESS NAME] · [CITY, STATE] · [DATE]

Executive Summary

We tested your enquiry-to-booking funnel the way a real prospective client would: *[describe the channels tested — e.g. website form, phone line, WhatsApp, mobile flow]*. Overall, your funnel scores *[]/100* — *[one-line characterization, e.g. "solid foundations, but N specific leaks are costing you bookings every week"]*.

FINDING 1

[Short, specific finding title — e.g. "The 44-Hour Follow-Up Gap"]

[What you actually did and observed, in first person, with specifics — a timestamp, a call count, a screenshot reference. Specificity is what makes this credible.]

WHAT WE OBSERVED

- [Observation 1]*
- [Observation 2]*
- [Observation 3 — delete if not needed]*

WHY IT MATTERS

[Tie to a real, cited stat or plain business logic — why this specific leak costs bookings. Keep it concrete, not generic.]

FINDING 2

[Second finding title]

Bottom Line

[Reassure: none of this is a redesign-level problem, if true — name what already works. Then name the theme connecting the leaks (e.g. speed of response, placement, absence of a system) and the rough scope/timeline to fix them, e.g. "a scoped, ~30-day project."]

This audit is diagnostic only — no obligation to work with us further. If you'd like a scoped plan to fix these leaks, reply to this report and we'll walk you through it.
